DELFINGEN further expands in China

DELFINGEN, global automotive supplier and leading manufacturer of on-board networks protection solutions and fluid transfer tubing, is pleased to announce the recent opening of its new facility in Chongqing. It demonstrates its commitment to meet the challenges of growth related to the strategic importance of China and its automotive market.

Known as the "Mountain City", Chongqing is located in Southwest China along the Yangtze River with a population of over 30 million people. The dynamic development of the city is largely due to the growth of Changan Automobile, a local Chinese automaker, who signed several joint-ventures with Ford, Mazda, Suzuki and Lifan and produced 2.8 million vehicles in 2015.

In addition to its existing footprint in Hebi (Henan province), Tianjin and Wuhan (Hubei province), DELFINGEN's new site of 1500 sqm in Chongqing will be focused on the manufacturing of its wiring harness protection solutions.

This new plant also integrates a local logistics hub and is able to provide customized services such as the just-in-time delivery to its fast growing customer base in Southwest China.

DELFINGEN thus confirms its constant will to offer an excellent service to its customers.

"The expansion of our capabilities with new operations in Southwest China is a further testament to DELFINGEN's commitment to better serve the increasing customer demand. We look forward to growing our presence in Chongqing as we address the needs of a growing market and drive innovation and quality in wiring harness protection." commented Damien Personeni, Executive Vice President.
