DELFINGEN expands its global presence with the construction of a new site in Nicaragua

DELFINGEN, a global automotive supplier and leading manufacturer of on-board networks protection solutions and fluid transfer tubing, continues to strengthen its global presence thanks to the forthcoming launching of a new site located near the city of Leon in Nicaragua.

DELFINGEN continues its investments and enters a strategic stage with this new facility, thus reinforcing its production and logistics capacities in Central America, a high potential area for the automotive industry.

The opening of this site is scheduled for the first quarter of 2018. It will be specialized in the manufacturing of its automotive wire harness protection solutions and will include an advanced logistics center enabling DELFINGEN to provide its local customers more flexibility, more reactivity and customized services.

This new site reaffirms DELFINGEN's vocation to be a proximity partner for the continuous improvement of its support to customer development. It equally demonstrates its constant commitment to providing a service of excellence.

Construction work starts
